

SLIDING TARIFF SCALE STUDIED.

Base Import Rate on Cost of Production, Idea.

Place Foreign Nations on More Equal Footing.

Scheme May be Tried Out if Found Feasible.

EXCLUSIVE DISPATCH.
WASHINGTON, Feb. 20.—A radical departure involving the levying or different rates of duty on imports from countries with varying costs of production, may be tried out by the House Ways and Means Committee drafting the new tariff.

Representative Fordney of Michigan, chairman of the committee, has said that the same general principle of this nature is desirable, if it can be shown to be feasible, constitutionally and not in violation of favored nations clauses or commercial treaties.

"We do not want to discriminate against Canada, which is our best customer," said Representative Fordney, in explaining the purpose he has in view. "The sliding scale of duty which is high enough to protect our industries against Japanese competition and against German competition they may prove prohibitive when applied to Canadian imports."

BASE TARIFF ON COST.

The general scheme is to provide for a sliding scale of duties and to apply one or the other as costs of production in foreign countries are high or low. Testimony before the House Ways and Means Committee last week was that the sliding scale would be more effective than the Payne-Aldrich Act will be necessary to provide adequate protection.

With respect to Germany the testimony had been that the proposed exchange condition placed costs in that country, relatively about the same as in Japan.

ALL ON EQUAL BASIS.

Rates double those in the Payne-Aldrich law have been asked by many manufacturers who seek to maintain their position in the market. On the other hand it has been stated that the rates in the Payne-Aldrich tariff would in many cases prove ample to protect against Canadian competition.

William G. Chapman, of Philadelphia, wants to do is to work out some scheme which will provide a degree of protection which will place each foreign country on about the same constitutional basis.

The most elaborate scheme furnished to the House Ways and Means Committee along this line, is the work of Judge Marion De Vries, of the United States Court of Customs Appeals.

Representative Fordney strongly impressed with Judge De Vries' scheme and has asked other members of the Ways and Means Committee to give it close study before rejecting it.

The constitutional objection to legislation such as proposed is that it involves a delegation by Congress of its power to regulate to administrative, judicial or other officers.

TWO LARGE FREIGHTERS LAUNCHED.

Matson Line Vessels Leave Ways Within Hour of One Another.

BY A. P. NIGHT WIRE.
CALKLAND, Feb. 20.—The two largest freight vessels ever launched in San Francisco Bay, the 14,500-ton Manulani and sister ship Manuka, destined for the Hawaiian trade, slid from the ways within an hour today at the Moore Shipbuilding Company yard here.

The vessels were built for the Matson Navigation Company and were christened by wives of directors of this concern. Mrs. Alexander F. Morrison, wife of the chairman, and Mrs. Green christened the Manuka. A crowd estimated at between 4,000 and 5,000 watched the vessels slide into the bay.

MISHAPS KILL 20,000 CHILDREN YEARLY.

BY A. P. NIGHT WIRE.
WASHINGTON, Feb. 20.—Accidents take the lives every year of 20,000 children up to the age of fourteen years, the Red Cross announced.

It shows that 157 out of every 1,000 child deaths between the ages of five and nine is due to accident, while 157 out of fourteen

years the ratio is 157 to the thousand.

WHERE :: EARTH :: ROCKED :: FOR :: DAYS.

Earthquakes Change Whole Contour of Country in Chile.

IS AUSTRALIA JAPANESE GOAL?

(Continued from First Page.)

added to that already existing because of the Irish question, is surely causing the two nations to drift apart.

JAPANESE PLAN.

The maintenance of the widening gulf between the two parts of the Japanese plan for the event of an attack on Australia is imperative that Britain should not interfere with Great Britain and if, when the time comes, Japan studiously avoids conflict with American interests, she trusts the animosity between the United States and England will have reached such a pitch that all changes of England being supported by America will have vanished.

Such brevity in the Japanese plan, and judging from the published statements and the trend of public opinion in America, who can say that it has not admirably succeeded thus far.

Japan continues to add to its mighty fleet, while America and England continued to drift apart, helped by the fact that Japan, aided by strong alliances against America.

If not for the terrible consequences involved in the war which would be ensuing, far from the idea of forming an Anglo-Japanese alliance, I maintain that the only alliance that can save our western civilization is a combination of the United States and America against the eastern menace. If that alone can be availed for them is no doubt another turn of events, America's turn will come next, even if a century should intervene.

LESSON OF PORTSMOUTH.

At Portsmouth, Japan has been foiling us and in so doing she is beginning to annoy individuals no matter on which side of the Atlantic he is, who in any way raises his voice or begs to all the causes, which are now driving the two great English-speaking races apart.

START TWENTY WELLS.

Oil Field Report for Week Shows Increasing Activity.

BY CARLE AND ASSOCIATED PRESS.
SANTIAGO (Chile) Feb. 20.—One hundred and ninety-two earthquake shocks were registered in six days in the zone affected by the seismic movement, which originated in the provinces of Valdivia and Cautin, in Southern Chile, a few weeks ago, according to belated advices to the Ministry of Interior.

Official reports now available, supplementing the earlier information, lay stress upon the violence of the shocks and the changes in the configuration of the country which resulted.

EXPLOSIVE ERUPTION.

The disturbance is believed to have been due to an explosive eruption of the snow-capped volcano of Villarica, 600 feet high, situated in the town of Puton, in Valdivia.

It is thought the crater of the volcano became plugged during the period of inactivity and that the explosion was caused by the accompaniment of the violent earthquakes. The volcano is said to be of the type that, as a rule, does not erupt very high, but ejects pumice and volcanic ash.

The Times Free Information Bureau

619 South Spring Street
THE TIMES FREE INFORMATION AND REPORT BUREAU is for the accommodation and benefit of persons seeking interesting routes of travel, desirable hotels and restaurants, and information concerning the various forms of transportation.

Particulars are furnished by competent attendants and by correspondents to the several public regarding rates and advantages of railroad and steamship lines, boats and planes, and by agents of the various forms of transportation.

Information is given concerning the various forms of transportation, and lists are kept on hand for inspection and distribution. This service is absolutely free. Letters concerning the Bureau may be addressed to THE TIMES FREE INFORMATION AND REPORT BUREAU, 619 South Spring Street, Los Angeles, Calif.

PERSONS COMMUNICATING VISITING LOS ANGELES ARE PRIVILEGED TO MAIL THEIR MAIL ADDRESSED TO THE BUREAU.

WILL TELL HOW HE SPENT COIN.

Wilson to Satisfy Curiosity of House Members.

Big Disbursements in Paris Will Be Explained.

Hotel de Crillon's Charges Are Called Too Much.

(EXCLUSIVE DISPATCH)

WASHINGTON, Feb. 29.—President Wilson will comply shortly with the terms of a House resolution adopted last Tuesday, calling on him for an itemized accounting of expenditures made by his authority from the fund of \$150,000,000 placed at his disposal in 1917 under the Neutrality Act.

How much information will be given in detail is not disclosed. It is supposed that many expenditures made by the fund are of confidential character, such as the employment of secret agents for war purposes and that these will not be given to the House. From what is known of the matter, however, the indications are that considerable sums that the House desires will be furnished.

The chief interest of the House, as shown in the debate preceding adoption, was in the payment of secret agents for war purposes and that these will not be given to the House. From what is known of the matter, however, the indications are that considerable sums that the House desires will be furnished.

(TOTAL EXPENSE)

The total actual expenditure of the American relief organization is estimated to be \$145,119. These disbursements include the expenses of various missions sent by the American Committee, the largest of which was \$73,275, charged to Gen. McKinstry for the proposed reparations commission.

Much of the debate in the House centered on the item in the President's proposal of "damages and loss of property" at the Hotel de Crillon on December 5, 1920, concerning the amount due to the President's authority in connection with the Paris Peace Conference.

(WILL PRESENT)

WASHINGTON, Feb. 29.—Still following the lead of Miss Alice Paul, whose policy triumphed in the convention of the national Woman's party, the new organization which rose Friday afternoon from the ashes of the party created to work for the Federal woman suffrage amendment, will begin at once the task of removing from all States and national laws any establishment maintaining discriminations against women.

"We believe the first task to do is to secure equality before the law," Miss Paul said. "To that end we believe in a pending blanket bill before Congress and the State Legislature so worded as to require the removal from existing statutes of all discriminations against women."

(USE OF THE CRILLON)

At the outset the officials of the committee decided to use the Hotel de Crillon as well as other premises, this decision being due to the difficulty of obtaining accommodations for the several hundred persons who had come to Washington to work for the suffrage amendment.

It is possible to give some information as to the commission that led up to the payment of this amount to the owners of the Hotel de Crillon. The American commissioners found themselves assigned there without having had the opportunity of making previous arrangements as to room and board, and from the few sources of the changes that the House critics probably were due.

MAY PROLONG SPAN OF LIFE.*Discussion Revived at London by Prof. Huxley.**Planarian Flatworms Found to be Susceptible.**Shell-Shocked Soldier Became an Infant Again.**BY CABLE AND ASSOCIATED PRESS.*
LONDON, Feb. 20.—Popular interest in the oft-discussed question whether it is possible to keep old age at bay indefinitely and correspondingly prolong the span of life has been revived by Prof. Julian Huxley of Oxford. Julian is a grandson of the great Huxley and inherits no inconsiderable measure of his talent for painstaking scientific research.

The common-sense view of the life-cycle, drawn from the observation of man and the familiar animal," said Prof. Huxley, "that in process of evolution and invertebrates in definite directions with a definite plan. The normal life-cycle of man, for instance, is as follows: The individual is followed by a period of growth accompanied by differentiation, then growth without differentiation, then senility and finally death, which supervenes as a natural process, even if not through disease or accident."

RESULT OF EXPERIMENT.

Experiments had shown, however, that this process was not irreversible, and was not inevitably similar in all animals. There was a way to modify the rate of growth and the length of the period of growth and thus prolong life.

"It has been shown," Prof. Huxley said, "that by experimentally starving and feeding planarian flatworms they can be kept not only within certain definite limits of size, as is the case with other worms, but also within certain definite limits of time. One animal has thus been kept of the same age—that is, the same lively activity, the same form, the same type of behavior—throughout a period which the rest of the breed have passed through nineteen generations; a period which, translated into human years, would be equivalent to Chaucer's 'Troylus and Cressida'."

This does not merely depend on the lapse of time; it is the expression of internal processes.

ELIXIR OF LIFE.

"The elixir of life so long sought in the middle ages has at last been found, and that is only for worms."

An illustration of reversal in mental life, Prof. Huxley mentioned was the shell-shocked soldier who, in the middle ages, had reverted to an early stage of mental existence, having the minds of children in the bodies of adults.

The most striking example, he said, was that of an Australian soldier who reverted to the condition of an infant, unable to walk or talk, and incapable of taking any food but milk. This is known as mental regression."

Prof. Huxley held that numerous other examples showed that the apparently irreversable course of the life cycle was only apparent, and that the ordinary type of life-cycle had been adopted as the most convenient but not the only possible method of grappling with existence. In the case of mammals, the normal life of rats had been prolonged by about 40 per cent.

"The question of life process," said Prof. Huxley, in conclusion, "has given way to experiment as the chief method of research, and experiment is leading to control."

WARRANTS OUT FOR CHEMICAL EXPERTS.

GERMAN CONCERN CHARGES BREACH OF CONTRACT AND BETRAYAL OF SECRETS.

BY CABLE AND ASSOCIATED PRESS.
COLOGNE, Feb. 20.—Warrants have been issued for the apprehension of four chemical and dye experts formerly employed by Friedrich Bayer & Co., of Leverkusen, on charges of having betrayed the secret of their company's employ and to enter at its disposal other valuable considerations.

They are described as old and trusted employees. They are charged with signing contracts with the DuPont and Koppers Company of Wilmington Del., which may be used to enter at its disposal other valuable considerations.

They are also charged with "illegally appropriating valuable receipts, formulas, etc., to which they had access."

A Dr. of Zurich, representing the American company, refused to have made the arrangements with the four experts and is reported to have been instrumental in securing the transfer of the German to the frontier of a truck containing documents, drawings and other scientific material.

Dutch authorities discovered the truck, which they seized and ordered its return to the Prosecuting Attorney at Cologne upon the latter's requisition. Flachlander and Rungs sailed for New York Dec. 21, before they were permitted to land. The whereabouts of Engleman and Jordan are unknown.

BY A. P. NIGHT WIRE.
ALAMEDA, Feb. 20.—Mrs. Hahn Russell Knowland, mother of former Congressman Joseph D. Knowland, and one of the few remaining early settlers of Alameda, died here today. She was 89 years old.

Mrs. Knowland and her husband, Joseph Knowland, came to Alameda about forty-eight years ago.

She is survived by her son, Joseph D. Knowland, a member of Oakland's delegation to the State Assembly; Mrs. Jessie Russell Hill of Alameda, three grand children and one great grandchild.

COMPER'S HITS LAW TO CENSOR CINEMA.

BY A. P. NIGHT WIRE.
WASHINGTON, Feb. 20.—If the New York Legislature enacts legislation for State censorship of motion pictures, it will add one more to the growing list of laws of a coercive measure on our law books."

Samuel Gompers declared today. He said he hoped compulsory governmental censorship would make no further inroads on American freedom of expression through motion pictures.

JAPANESE DIET HAS TURBULENT SESSION.*MANY ARRESTS FOLLOW FAILURE OF ATTEMPT TO VOTE LACK OF CONFIDENCE.**BY CABLE AND ASSOCIATED PRESS.*
TOKIO, Feb. 20.—Many arrests were made outside the Diet last night following defeat in the House of a resolution of lack of confidence in the government. The vote was 255 to 141.

The session was turbulent. The galleries were crowded, including many women. Speakers for the government and the opposition were heard.

T. Takeichi, former Minister of Finance, spoke in favor of the Kai party, accused the Ministry of thinking always of the Ministerial party. He said the government had failed in its efforts at home and that it had brought disgrace abroad. M. Moka, former Speaker of the Chamber, said the Cabinet's policies were justifiable, even if they had not always been made public. If the relations between Japan and China were not ideal, he declared, this was due to the former Ministry of Count Okuma, who had made unreasonable demands on China.

During the demonstration outside the Diet there were simultaneous meetings at parks at which the representatives of the government were demanded.

At a mass meeting today under the auspices of the opposition party, a resolution was adopted declaring that the government had no confidence in the government. It is estimated that 20,000 attended.

PLANS TO STARTLE SCIENTIFIC WORLD.

*DR. DE VOYNICH PROMISES TO REVEAL SECRETS LOCKED UP BY ROGER BACON.**BY EXCLUSIVE DISPATCH.*

CHICAGO, Feb. 20.—Dr. Wilfred De Voynich, bibliophile and manuscript collector, will make an address before the American Philosophical Society in Philadelphia on April 20 which will startle the scientific world. Dr. Voynich, who was in Chicago today, says he will reveal some of the secrets locked up by Roger Bacon, the thirteenth-century wizard, in the code which the doctor deciphered.

Dr. Voynich had with him photographic prints of several pages of the "Book of Mystery," the original of which came into his possession years ago. Bacon wrote in Latin, which he did not understand. His works were published. His more secret writing, however, he concealed from the world in a code, keeping at the time that the secret would be sealed forever with his death.

The code somewhat resembles ancient Hebrew. Crude illustrations are given in the book, according to Dr. Voynich, have their significance. Thus far he has deciphered about 26,000 words, but even this small part of the work, which requires 200,000 words, is a revelation.

Bacon, explaining that two of the fascimile pages have to do with the origin of the content of the book, "When the time comes," he says, "I will prove to the world that the black magic of the Middle Ages consisted in deciphering the secret of the universe."

Details of the adventure of the code will be given at the meeting to be held at the American Philosophical Society on April 20.

Dr. Voynich will be sent to Spain next month, will be the second question.

WILL PROTECT CITRUS INDUSTRY FROM PESTS.

*SECRETARY MEREDITH SIGNS QUARANTINE ORDER TO KEEP OUT FOREIGN BUGS.**BY EXCLUSIVE DISPATCH.*

WASHINGTON, Feb. 20.—A quarantine to protect the citrus industry of the United States by preventing the introduction of the citrus black fly, an injurious insect pest, was announced today by the Federal Horticultural Board of the United States Department of Agriculture.

Secretary of Agriculture, Herbert C. Hoover, signed the order.

Secretary Meredithe becomes effective April 1, and provides regulations for the entry into this country of fruits and vegetables from Cuba, the Bahamas, Jamaica, the Canal Zone, Ceylon, India, Philippine Islands, Ceylon and Java.

The quarantine applies to the products in their raw or unprocessed state and any plant or part of them used as packing material.

The rules cover the movement of any railway car, boat or other vehicle from these countries upon its return to the United States.

Clean fruits and vegetables, other than those subject to special quarantine, may be imported from these countries upon compliance with the regulations. No restriction is placed on the entry of processed fruits and vegetables. Action was taken following a hearing at which many persons interested in the quarantine were present.

MOTHER OF FORMER CONGRESSMAN DIES.

BY A. P. NIGHT WIRE.

ALAMEDA, Feb. 20.—Mrs. Hahn Russell Knowland, mother of former Congressman Joseph D. Knowland, and one of the few remaining early settlers of Alameda, died here today. She was 89 years old.

Mrs. Knowland and her husband, Joseph Knowland, came to Alameda about forty-eight years ago.

She is survived by her son, Joseph D. Knowland, a member of Oakland's delegation to the State Assembly.

Mr. and Mrs. Joseph D. Knowland of Alameda, three grand children and one great grandchild.

RED CROSS REDUCES NUMBER OF DIVISIONS.

BY A. P. NIGHT WIRE.

WASHINGTON, Feb. 20.—Contraction into eight administrative districts, instead of thirteen, is an aim of the American Red Cross organization.

The new divisions will be known as the New England, Atlantic, Lake, South, Mountain, Southwestern, Pacific and Northwest. Eventually the northwestern division, including Oregon, Washington and Idaho, is to be separated with the Pacific division and administered from San Francisco.

JAY EDITOR URGES PEACE.

BY CABLE AND ASSOCIATED PRESS.

TOKIO, Feb. 20.—At the annual meeting of the International Press Association, the president, M. Yamamoto, urged the press of Japan, America and England, "the three countries controlling the destiny of the world," to devote their energies to peace.

BIRD LIKES METHODIST SERVICES.*But Preacher Not So Well Pleased with Visitor; Disturbs Congregation.**BY A. P. NIGHT WIRE.*

SPRINGFIELD (Ill.) Feb. 20.—Emulation of St. Francis of Assisi was not what year-old Kate Pilgrim, 54 years of age, was shot and killed by Thomas Kelly, 47, who then shot himself through his brain, at the home of his wife and her mother, 1425 Brooklyn avenue, last evening.

According to the story told the police by the dead man's wife, the tragedy began when the mother, Mrs. Pilgrim, arrived from England last April. Dissension arose and in June Mrs. Kelly left home to live with his mother at the Brooklyn-avenue address. Shortly afterward she applied for a divorce.

Yesterday Kelly went to the home of his wife and her mother and after getting out of prison again, he began packing a suitcase.

Sometimes later, while his wife was in the rear yard, he met Mrs. Pilgrim in the doorway. He struck her in the heart and fired, killing her instantly. He then killed himself. The bodies were taken to the rooms of the Boyle Heights Undertaking Company.

RESULTS FAIL TO AID JOBLESS MEN.

*THOSE WITH SNUG JOBS ARE NOT INTERESTED IN FATE OF UNEMPLOYED.**BY EXCLUSIVE DISPATCH.*

CHICAGO, Feb. 20.—The Chicago Federation of Labor's program for the solution of the unemployment problem by shortening the hours of the man now at work so as to permit a division of jobs evaporated today when 300 delegates who assembled to discuss it failed to take any action.

Charged made by President John Fitzpatrick that the men with snug jobs were uninterested in the fate of the unemployed, was denied by the delegates.

Today, however, the delegates voted to endorse the bill introduced by Representative E. G. Sandmeyer, pastor of Laurel Methodist Episcopal Church, who for the third time has introduced a bill.

Today, however, the delegates voted to endorse the bill introduced by Representative E. G. Sandmeyer, pastor of Laurel Methodist Episcopal Church, who for the third time has introduced a bill.

SAKS INDETERMINATE LAW HITS HARDENED.

*GIVES YOUNG CRIMINALS NEW CHANCE; ASSETS WARDEN OF SAN QUENTIN.**BY A. P. NIGHT WIRE.*

MILWAUKEE, Feb. 20.—City Attorney Williams will prepare a bill asking the State Legislature to expand the jurisdiction of the State Railroads Commission.

Representative D. O. Stone of Waukesha, chairman of the House Committee on Railroads, introduced a bill yesterday.

OKLAHOMA BANDIT NEAR DEATH'S DOOR.

BY A. P. NIGHT WIRE.

HARRISON (Ark.) Feb. 20.—Hyper Starr, Oklahoma bandit, who was shot when he and his companion attempted to rob the First National Bank here Friday, probably will not live until morning, his physicians announced tonight. Three men arrested at Seligman, Mo., and brought here, were released after being questioned.

Mr. Starr had just completed negotiations to sign with a film company for an "outlaw" picture.

ORGANIZATION AIDS SMITH-TOWNER BILL.

BY A. P. NIGHT WIRE.

WASHINGTON, Feb. 20.—An organization composed of men and women, has been formed to work for passage of the Smith-Towner bill to create a Federal department of education.

Details of the advocates of the bill will be given at a meeting of the newspapermen on subjects of education, to be held each session.

Public meetings will be held when the bill is introduced in Congress.

Mr. Starr said his husband had

been shot when he and his companion attempted to rob the First National Bank here Friday, probably will not live until morning, his physicians announced tonight.

Three men arrested at Seligman, Mo., and brought here, were released after being questioned.

NO DISORDERS AT GERMAN ELECTIONS.

BY CABLE AND ASSOCIATED PRESS.

BERLIN, Feb. 20.—Reports from Prussia, where elections are being held today, indicate that the balloting is going on without disorder.

Less than 70 per cent of the voters cast their ballots. In Greater Berlin the Communists were active.

EXECUTIVE SECRETARY NAMED BY DEMOCRATS.

BY A. P. NIGHT WIRE.

WASHINGTON, Feb. 20.—Appointment of Burt New, an attorney for the Democratic National Committee, was announced today by Chairman White. He will assume his duties March 1.

MARTIAL LAW IN HUNGARY.

BY CABLE AND ASSOCIATED PRESS.

VIENNA, Feb. 19.—Martial law is reported to have been declared in Hungary in view of the threatened general strike of the workers, who demand increased pay.

OLDEST UNION PRINTER DIES.

BY A. P. NIGHT WIRE.

COLORADO SPRINGS (Colo.) Feb. 20.—Robert G. Thompson, 83 years old, the oldest resident at the union printers' home, died also in membership, died here today.

AKRON.

AKRON (O.) Feb. 20.—Fire

destroyed the Portage Country Club on North Portage Path. The

estimated loss is \$150,000.

J. N. Garver of Toledo has been named secretary of the Better Business Bureau. He assumes his duties March 15.

A. H. Marks, millionaire, is in Akron to make final settlement with his former wife regarding the Marks household.

Capt. C. P. Forstane has been

given charge of the new mounted National Guard troops here.

TAMPICO HEADS ACCORD NO AID.

Sit Back and Let Americans Try to Improve City.

Official Co-operation Not on Their Program.

Quick Growth Forces Unique Contrasts on Streets.

American enterprise has made Tampico, Mex., perhaps the oldest municipal anomaly in the world, a few square miles of twentieth century New York sparkling—or glancing—out of a Latin-American background, an old-world that it reminds one of descriptions in the Old Testament of the hawks of wood and waters. The Americans who composed the products of their labor to the towns on the backs of asses. It is a city of most astonishing contrasts, one of a mighty American motor truck into a fearsome honk, which makes you impel the high jump record, only to find, on looking up, that it comes from the horns of the truck. The Americans who have attached to an ancient one-horse vehicle the shafts of which rattle like the teeth of the movie power.

You can see a modern street car, longer than the ordinary surface car in New York, and a burro loaded like a hay wagon with bundles of fagots, is stopped by its rear end on the sidewalk, sitting against an ancient stone wall, which inevitably recalls to mind pictures in the Old Testament, and in the Dore Bible Illustrations, and as follows:

REDUCTION IN OUTPUT CONTINUES

Oil Price May Rebound If Texas Producers Continue Cutting Down Supply.

[SPECIAL CORRESPONDENCE]

AUSTIN (Tex.) Feb. 15.—If the present movement for the curtailment of crude oil production, which is being effectively put into effect in the North Central Texas fields, continues in force many weeks the price of the product will be forced upward to something like the figure it was before the recent slump began.

There are still full operation, so far as shown by reports received here. This applies to the smaller independent plants as well as to the larger companies which have modern pipe lines and marketing ends. Plans also are on foot for the construction of new refineries in different parts of the State.

IS NOW DR. RALPH ARNOLD.

The honorary degree of doctor of science was conferred upon Ralph Arnold of Los Angeles last week by the University of Southern California. Dr. Arnold is recognized as perhaps our foremost authority on paleontology, or the study of fossils, which branch of science is of great importance in locating possible oil lands.

There has been a reduction of about 15,000 barrels in the daily production of the North Central Texas fields since the 1st inst. There is average daily production in the territory of something like 200,000 barrels, which is 20% less than the amount produced by the Americans at the beginning of the month.

In consequence of a demobilized market, field development has been very dull and may be expected to

continue so. The South Bend area of Young county seems to be the center of attraction. Activity is greatest in this field, although very little oil is being taken out of the top of the ground as is evidenced by a lack of increase in the pipe-line runs. At least ten and probably double that number of wells in the South Bend area are shut down at depths at which they can be completed in a few days when pipe lines and storage are available.

Two eight-barrel oil producers, one from the 700-foot shale sand in the Iowa Park field, have been finished by C. F. Spencer and others, both tests being drilled on the Watauga lease.

All the refineries in Texas are still in full operation, so far as shown by reports received here. This applies to the smaller independent plants as well as to the larger companies which have modern pipe lines and marketing ends. Plans also are on foot for the construction of new refineries in different parts of the State.

STATE CORPORATION COMMISSION PERMIT GRANTED

RARE MINERALS, METALLURGY, CHEMISTRY.

You are kindly requested to submit samples, carefully wrapped and tagged, with letter accompanying stating what kind and dimensions. Make sample of small size. There is no charge for the analysis. Correspondents offering matter for analyses will receive a copy of our catalog. Show that you are from Jim Jones. For instance, with no marks on identification card, we will, hereafter, receive no attention whatever.

Base-metal Alloy.

PHOENIX (Ariz.) Feb. 1.—Question: Under separate cover you are sending me a sample of metal that was picked up in Yuma county. It seems to be very hard and takes a very high heat to melt same. Can you give us an idea as to what it is and is it of any commercial value?

Answer: The sample is on the order of Indian smelter work, and is the result of a very early attempt at smelting some probably in an iron ladle. It carries copper, zinc, and tin in greater or lesser percentages with flux matter, etc. To arrive at this as to other metals that may be present call for quantitative analysis.

Arsenic Present.

SACRAMENTO (Calif.) Feb. 1.—Question: You send me two samples for classification. Thanking you in advance.

Answer: No. 1 is a very much altered greenish rock. Lime-silicate alteration, with traces of stromatite. The dendritic coating on the rock is not silver ore; it is dendritic manganese. (Green rock of the mining district.) The microscopical veins contained the original pyrrhotite. No. 2 contains larger-sized veins than No. 1, and reacts more or less for realgar and orpiment; iron and manganese present, and not further sampled.

Altered Rock.

BROWNS, Feb. 2.—Q.: I am mailing a sample of rock from the Argus Mountains. I would like to know what the white silvery-looking mineral is. Does this rock carry gold or silver, and what is the character of the rock—is it doleritic? A.:

The rock is very altered doleritic in part. The silvery looking (microscopic) substance sparingly in the rock contained resemble talc, but that element is not present. Microscopic veins pointing to the rock shows in the way of sulphides. Free gold is absent. Feldspathic matter, iron-lime carbonates sparingly in the sample, and not tested for silver.

Two Samples.

SANTA ANA, Feb. 1.—Q.: I send package of clay I wish analyzed. I have an interest in a large bed of this clay, and would like to know what it is. I have an idea that it is

Test the inclosed sample for oil? S.

Altered Rock.

FLORISBURG (Colo.) Feb. 4.—Q.: May I mail you a sample of rock found twenty miles north of Cripple Creek, Colo. Please analyze and report results in the usual column. Thanking you for past favors.

A. The rock sample is porphyritic syenite carrying three very minute specks of either sulphide or telluride origin. It is too small to identify for identification.

It will be a pleasure to test more of this rock for you providing that you mail samples sufficient to properly identify the substance whether sulphide or telluride.

Platinum Absent.

SAN BERNARDINO, Feb. 4.—Q.: May I mail you a sample on your nature to test out some rock from about twenty miles north of San Bernardino? No. 1 chloride of gold or what? No. 2 mercury? No. 3, platinum? No. 4, (?) I am sending above four samples by parcel post.

Two Samples.

The People and Their Daily Troubles

The Tragedy of Clothes: A Hint to Makers of Movies

BY JANE DIXON.

At that greatest of all mirrors of the world—the movies, a lesson of clothes.

And, as so often happens in the movies nowadays, the lesson taught is the bargain.

For the movie, in its present smocharine tense, must have a happy ending.

Only master makers, directors who dare, producers with enough courage and enough dough to stick to their ideas of art, to the realities of life, bring a screen story to its logical conclusion.

Clothes, a subject which needs so cryingly to be presented, is in the lecture platform, nor the solemn warnings of the pulpit, nor yet the very inventive of the soap-box So-called puritan.

Where, then, but on the screen?

How but by the convincing argument of example, the tragedy of the lady peacock who flaunts her fine feathers in the snoot of public admiring the blinding of her own artistic nest and making a neat living in the bargain.

The current season has been a continuous success for The Chinese food famine has nothing on the part the fatigues along Broadway. Many a player of abundant luminosity has been compelled "to act." "Actress" Equity has a return ticket from Salt Lake City to another port beyond walking distance.

Meantime hotel bills pile up.

Expenses mount.

Evening wear is in, hook, including theater trunks and the stage jewelry.

"I know I will strike it right some day," smiles the talented young actress, whisking away bright new schools, greater than that of Maine, New Hampshire and Vermont combined.

Having been a zealous follower of the Bull Moose aggregation it was my conviction that what they did was right.

"The trouble with most of us is that we cannot do what we like, we will do nothing at all."

"I'm not wild about cooking, nor housework, either. But I can do both and do them pretty well. Then why not be busy while I am waiting for the real job to come up?"

"In the meantime I am here in New York. I can keep in touch with what is going on. I can visit the agents without fainting on the doorstep."

"My income from the apartment is sufficient to provide attractive clothes, if not expensive ones, so I can go into an office with the feeling of a real business man."

"Nothing breaks the spirit of an actress or an actor like dowdiness."

"She refused to marry the rich suitor for whom she had angied herself, if only they did not care."

"Business of the 'heavy' who had supplied the mother of these many stars originally falling down stairs and out of the picture."

"Later, she discovers it was the man himself for whom she cared."

"Business of the 'heavy' who had supplied the mother of these many stars originally falling down stairs and out of the picture."

"Heroine in hero's arms, vows of eternal affection, wedding bells."

"Whatever they call these superproductions of Mme. Heroinine have a rich opportunity for the mind of the movie to give to its market something really big, something worth while, something to take home and mull over in quiet hours."

"The girl wears clothes and clothes, a new gown for every hundred feet of film."

"She is rapid, as useless, as self-satisfied as ever trifles in the shining hours in a Fifth Avenue clothes emporium."

"Only once in all the 'star special' whatever they call these superproductions of Mme. Heroinine have a rich opportunity for the mind of the movie to give to its market something really big, something worth while, something to take home and mull over in quiet hours."

**HILLINGLY HITS KING TAX BILL.****BEATS HYMEN IN RACE FOR GIRL.**

Policewoman Arrives Before Under-Age Bride-to-be Utters Fatal Word.

Policewoman Vaughn yesterday ran a race with Hymen, and won.

As the result of an investigation following the report from Mrs. C. Menter of 6024½ Walnut avenue that her daughter, Justine Menter, age 15, had run away from home on Friday, the policewoman found the missing girl just preparing to say "I do" opposite her sweetheart, Floyd Harmon, at the home of friends at 223 West Avenue 26. The fatal words had not been uttered, so the girl was taken away to Juvenile Hall, and from there sent home to her mother.

HITS PARTISANSHIP IN KING TAX FIGHT.

BELIEVES SCHOOL HEAD WAS DRAWN UNWITTINGLY INTO POLITICAL CLASH.

A thoughtful criticism of the participation by Mrs. Susan M. Dorsey, superintendent of the Los Angeles schools, in the King tax bill controversy is voiced in a letter sent by Charles H. Merrill, prominent Los Angeles business man, to C. J. McCormick, president of the Board of Education.

Though definitely aligning himself with those who seek to give adequate support to the schools, Mr. Merrill in his letter shows a shrewd recognition between intelligent support of necessary expenditures and unconsidered partisanship for inexcusable extravagance in State government.

The letter ends to Mr. McCormick,

in which Mr. Merrill asserts "unwittingly, no doubt, Mrs. Dorsey, a public servant, is venturing into politics by aiding in the Governor's program," is as follows:

Hon. C. J. McCormick,
President, Board of Education,
Los Angeles, Cal.

Dear Sir:—I have read with deep interest the ex-superintendent of Mrs. Susan M. Dorsey, superintendent of city schools, for the support of the King bill, also the resolutions adopted by the State Teachers' Club to back him. I am opposed to the King bill, but to the educational institutions of California and would not curtail one iota of their educational work or their maintenance, and especially for placing the teachers' salaries on a permanent better basis.

It is unfortunate that the Governor has not had the courage of a Gov. Leland or a Gov. Gillett.

The governor of Illinois costs \$48 per capita, while the government of California costs \$7.78 per capita, and the average for all the states is \$11.66. The King bill, however, has more than doubled the expenses during his five years as chief executive. He has devised no plan for reducing the cost of the King bill, and has lopped off the numerous overlapping and useless commissions.

The argument summits down to the undisputed fact that the government of any State in the Union and that Gov. Stephens has failed utterly in redeeming his promise to reduce the cost of the King bill.

Gov. Stephens has more than doubled the expenses during his five years as chief executive. He has devised no plan for reducing the cost of the King bill, and has lopped off the numerous overlapping and useless commissions.

Gov. Stephens has more than doubled the expenses during his five years as chief executive. He has devised no plan for reducing the cost of the King bill, and has lopped off the numerous overlapping and useless commissions.

It is unfortunate that the Governor has not had the courage of a Gov. Leland or a Gov. Gillett.

The governor of Illinois costs \$48 per capita, while the government of California costs \$7.78 per capita, and the average for all the states is \$11.66. The King bill, however, has more than doubled the expenses during his five years as chief executive. He has devised no plan for reducing the cost of the King bill, and has lopped off the numerous overlapping and useless commissions.

WOMAN SICK FOUR YEARS

Was Finally Made Well by Lydia E. Pinkham's Vegetable Compound

Steens, Miss.—"I was all run down and nervous with female trouble and my sides pained me so at times that I could hardly stand. I suffered for four years with it. Then I saw your advertisement in the paper and I began taking Lydia E. Pinkham's Vegetable Compound. I feel stronger and able to do most of my housework now. I recommend your Vegetable Compound to my friends and you may use this letter if you care to do so."—Mrs. W. H. Blake, Route 1, Steens, Miss.

How many women, overworked, tired and ailing, keep up the ceaseless treadmill of their daily duties until they are afflicted with female troubles as Mrs. Blake was, and are run down, weak and nervous. But every such woman should be convinced by your letter like hers which are constantly published proving beyond question that Lydia E. Pinkham's Vegetable Compound will overcome such troubles, and write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., in regard to their health.

DON'T FUSS WITH MUSTARD PLASTERS!

Musterole Works Without the Blister—Easier, Quicker

There's no guess in mixing a mess of mustard, oil and water when you ready mix Musterole—no mess or difficulty with a little mess, white Mustard.

Mustard is made of pure oil of mustard and other helpful ingredients, combined in the form of the present white ointment. It takes the place of mustard plasters, and will not blister. Musterole has given great relief from sore throat, bronchitis, tonsillitis, cough, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pain and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosty feet, colds of the chest, it often prevents pneumonia; \$2.00 jar; hospital size \$3.00.

They Appeal to Our Sympathies.

The illus and dyspeptic are constant sufferers and appeal to our sympathies. Many such, however, have been completely restored to health by the use of Chrysanthemum Tablets. These tablets strengthen the stomach, invigorate the liver and improve the digestion. They also have a tonic effect upon the bowels. When you have any trouble with your stomach give them a trial.

THE GUMPS—THE SHADES OF HIS ANCESTORS

As an Inventor Jeff Finds He Has a Competitor

[Copyright, 1921, by H. C. Fisher. Trade Mark Reg. U. S. Pat. Off.]

HUTT'S BEEN LAUGHING AT ME OVER MY FAILURE TO INVENT A BURGLAR-PROOF LOCK, BUT THIS OLD VEST GIVES ME AN IDEA! HE WHO LAUGHS LAST LAUGHS LAST LAST CHUCKLE.

I'LL TELL HIM I'VE INVENTED A BULLET-PROOF VEST. I'LL LOAD MY REVOLVER WITH BLANK CARTRIDGES AND LET HIM SHOT AT ME!

HE'LL NEVER GET WISE AND IT'LL MAKE HIM THINK I'M REALLY A GENIUS AFTER ALL!

MUTT, I'VE INVENTED A BULLET-PROOF VEST. HERE, TAKE THIS GUN AND SHOT AT ME! I'LL SHOW YOU I'M SOME INVENTOR AFTER ALL!

A BULLET-PROOF VEST? THAT'S MY OPPORTUNITY!

I'VE JUST INVENTED A BULLET THAT I GUARANTEE TO PIERCE ANY BULLET-PROOF VEST MADE AND THIS WILL GIVE ME AN OPPORTUNITY TO TRY IT OUT.

SAP!

BANDITS HOLD UP ROADSIDE CAMP

HIGHWAY WORKERS VICTIMS OF GUNMEN, WHO ESCAPED IN THE DARKNESS.

[EXCLUSIVE DISPATCH] MECCA, Feb. 20.—Four hold-up men raided and robbed a highway construction camp six miles south of here last night and escaped. Special exercises commemorative of the anniversary of Washington's birth will be held in all the schools.

[EXCLUSIVE DISPATCH] SAN DIEGO STAGES BIG SPRING FROLIC.

[EXCLUSIVE DISPATCH] WATER CARNIVAL AND THREE-RING CIRCUS PART OF PROGRAM.

[EXCLUSIVE DISPATCH]

SAN DIEGO, Feb. 20.—A spring carnival designated as the San Diego spring frolic will begin tomorrow night with a ball in the old Cristobal Building in Balboa Park, given to raise funds to rehabilitate the South County Building of the exposition.

Tuesday there will be a water carnival, featuring a boat race, and Wednesday, a three-ring circus and pageant will be held in the afternoon in the big concrete bowl, the dance at the Cristobal will close the frolic.

The building occupied by the San Joaquin, San Bruno, Benicia, Riverside, Imperial and Ventura during the exposition, will be re-painted at a cost of \$15,000. There is now a total of \$40,000. All the money raised by the Ad Club through the performance of the San Gabriel Mission Play in the park three years ago. A music auditorium, reception hall and a room for the community theater and other organizations will be provided.

[EXCLUSIVE DISPATCH]

NATIONAL AVIATOR WEDS COLLEGE SWEETHEART.

[EXCLUSIVE DISPATCH]

SAN DIEGO, Feb. 20.—The first military wedding ever celebrated at the naval air station, North Island, will take place at noon

at the church of the Immaculate Conception.

The Welsh people of Long Beach will hold their annual reunion at Bixby Park tomorrow. An elaborate program will be presented and will be set aside for basket lunches. Among the speakers are ex-Judge W. H. Thomas and Dr. R. H. Jones. The Welsh national hymn and other songs of that country will be sung.

[EXCLUSIVE DISPATCH]

WELSH PICNIC.

The Welsh people of Long Beach

will hold their annual reunion at Bixby Park tomorrow. An elaborate

program will be presented and will be set aside for basket lunches.

providing

[EXCLUSIVE DISPATCH]

ARREST PIANO SALESMAN.

Jack Raymond, alias Jack Hardigan, former Long Beach piano salesman in the employ of the American Music Company, 221 East Third Street, was arrested on a felony charge in Los Angeles yesterday by Detectives Worley and Ayres of the local police department. Raymond is alleged to have embezzled several hundred dollars from the local music concern last June.

[DEDICATE DANCE HALL.]

It is estimated that more than 60,000 persons visited during the evening of opening of the Clymer and Sonnen's Dance Hall in the new Markwell Building last night. The new terpsichorean establishment represents an expenditure of \$50,000 and is regarded as one of the highest class places of its kind in the West.

[OLD RESIDENT DIES.]

Mrs. Lyda D. Houghton, 77 years

years old, of 2658 Elm avenue, a resident of Long Beach for the last eighteen years, died today at her home. Mrs. Houghton was a widow of W. F. Hogue, commander of the Long Beach Post G.A.R. She also leaves another brother here, James H. Hogue. Other surviving relatives are her son, Mr. H. C. Hogue, of Ames, Iowa, and a daughter, Mrs. C. A. Canady of Ambridge, Pa. The body is at the Cleveland undertaking parlor, where services will be held today afternoon. Many local patriotic organizations will be represented.

CHICAGO

SPIRITUAL LAW IS OMNIPOTENT.

Christian Science Speaker Tells of its Working.

Says People Are Coming to Reach Beyond Selves.

Tells of Healing That Comes Through Infinite Love.

Prof. Hermann K. Hering of the board of lecturers of the mother church, the First Church of Christ, Scientist, in Boston, delivered a lecture on Christian Science under the auspices of the Sixth Church of Christ, Scientist, of this city, last week. Prof. Hering was formerly a teacher of mechanical and electrical engineering, and for a number of years was a member of the teaching staff of Johns Hopkins University of Baltimore. The lecturer spoke in part as follows:

"When we consider the unsettled conditions and turmoil prevalent in the world today, though naturally remedies out for both their cause and their solution, the world is an aggregation of individuals, hence its condition, the quality of its thinking, the character of its activities are a composite of these factors in its constituents. In other words, world conditions are the product of the lives and mentalities of its people, and through these, of their ethics; their ambitions, and their resultant conduct. If the members of a community will live rightly, that community will be measurably more harmonious, happy, peaceful; if they live wrongly are selfish, immoral and vicious, the community can but be correspondingly discordant, unhealthy, unhappy."

PRINCIPLE AVAILABLE.

"Today many things appear to us which we have not seen before, that the healing work of the early church is yet possible, although this healing work rebukes the generally accepted supremacy of material law. They perceive that man is not bound by the principles of law, a law apart from physics; that this divine law is and should be sovereign over so-called physical law; that it has dominion over what is called matter, even though in spite of the laws of materialistic thought, which declares that any existence apart from the material cannot be conceived. It is encouraging to know that the spirit is beginning to awake out of their sleep and to assert their right to the freedom and harmony of the children of God."

The perfect nature of God and the secret of his ways was revealed to Mrs. Eddy. The Scriptures spiritually understood reveal this truth, and Mrs. Eddy first stated it in scientific language, and then, when fully understood, make it possible for anyone to begin to demonstrate it. The creative principle operates positively through divine law, it embraces and includes all law, and makes the God, perfect man, and perfect universe.

DIVINE LOVE REAL HEALER.

"Christian Science treatment, or the scientific application of divine love, is an absolute guarantee of the clear knowledge of the nature of God and the real man, and the consequent perception of the unreality of creation and evolution. An analysis of the which is to be healed, a spiritual discernment of the mental cause of the trouble, and a correct application of the antidiving divine law, will bring about a cure of these causes. This is not a mere repetition of words, but is a scientific mental process, the reflection of divine law, which demonstrates the healing through right knowing and right living."

Christian Science healing brings about not merely a physical change, but improves the patient morally, mentally and spiritually. It brings a man near to God and closer to the spiritual basis. Its uplifted thought gives him power over evil and improves his whole being in the degrees that he can grow. The goal, the divine goal, is to heal himself and others through the Christ-method, with unmistakable signs following.

This revelation, coming not from any man, but from the Being human experience and knowledge, is yet so irresistible in its appeal and so glorious in its effects that it is well worth the study. Mrs. Eddy's book, "Science and Health with Key to the Scriptures," readily reaches and convinces those who hunger and thirst for better things."

AUTOS TAKE DEATH TOLL.

(Continued from First Page.)

he rear of another machine and hen crashed into a telephone pole. The three injured were rushed to the Receiving Hospital in Los Angeles by a passing auto.

Mr. Brooks' injuries consisted of fractured shoulder and cuts and abrasions. Mrs. Buck received a sensible fractured arm and ribs and abrasions, and Mr. Koch an injured arm.

FOR LIBRARY WORKERS.

Beginning today the Los Angeles Public Library is offering a two week course in library technique. The lectures cover the simpler phases of library work and are intended to prepare high school graduates to occupy the clerical posts in the library.

Four Thousand Fans See Pedal Pushers in Mad Whirl.

ARBUCKLE GRABS THE BIKE CROWN.

Wins State Title in Three Straight Heats.

Pedal Racing Comes Back in a Whizz of Glory.

Natives Turn Out Strong at the New Stadium.

BY HARRY A. WILLIAMS.

After a lapse of more than a decade, bicycle racing came back yesterday with a whiz, one might say a gree-whiz, that being the strongest language permitted in this strict and corrected era of correctness.

More than four thousand folks, almost filling the new Vail-Griffith-Pickens stadium at Hill and Washington, participated in the revival of the two-wheel sport here, and Clyde Arbucks, representing the Gasoline State, California, Joe, won the California State championship in straight heats of a half, three-quarters and one mile.

TWO CHAMPS.

Clyde is a brother of Fatty Arbuckle, which puts two champions in the family, whereas there was a time when the name Arbuckle was for only a package of medium-priced coffee, and no sinkers.

Burney Oldfield's diamond medal is the product of Peter DePauw by virtue of a 10-mile and half-mile handicap, which drew a field of forty-one, and was run in three heats. DePauw is a nephew of Burney DePauw.

Clyde and Fatty no longer need bask in the reflected glory of their illustrious relatives.

Fatty bears some family resemblance to Burney, but Clyde none other to his brother. The Arbucks brothers are listed the same as baseball team, heavyweights and lightweights. Fatty outweighing the average complete team, including the mascot and water boy.

“TERRIBLE SWEDE” WINS.

The mud-mud-out race, with a field of five starters, was won by Gus Hachanoff, the “Terrible Swede,” who in the final turn of the pedals lifted his front wheel out a foot in front of Joe Palmer, set a record for a third. In this race, the man who is last at the completion of each lap is compelled to drop out, until but four remain on the track. This makes the advantage rest with the fastest. When only four remain, they are given the gong and fight it out for one more lap. This race is a thriller, and bound to become a classic in the history of the handicap and the pursuit race.

Al Halsted of New York and Fred Phelps, the Australian, played each other with the skill of veterans in their mid-element. It was here a exhibition of jockeying. The advantage rested with one, and then the other. On the last lap the men dropped down, and the two either to make the break. Halsted suddenly shot out in front. Kefel's machine leaned forward only a fraction of an inch. But the finish was decisive. Halsted had gained a length's lead, and held it while the two machines hung dead on the last turn, shot down into the switch and across the line.

WHAT HOLD BACK.

In every event, except the handcapped, lap races and pursuits, there is more or less jockeying and leaning, the men reserving their energies for the final dash. The French system, and prevails among the best riders, and of course, insures a heart-breaking finish. There were a number of spills, the first of those arrived in the opening heat of the State championship event. Facing the starter were Arbucks, Thompson, George Molder, Olympic Club, San Francisco, and Alvin Drysdale, Fresno Cycling Club. Barney Oldfield was the favorite, and Frank Chance was the impetus behind Drysdale at the barrier. Coming out of the last turn, the field had been reduced to four, and leaving a slight advantage, Arbucks and Drysdale coming out of the turn. Luck was with the former. He had remained steady while his rode on to victory. Drydale did a handspins over his handlebars, hit the track with his head and slid down the steep incline leaving considerable mud from his wheels above the track. He followed the bike game in Australia, and some future for it. He believes this will be the half-way point for amateur riders to and from New York.

ENRICHES HISTORY.

Fred St. Onge enriched history by doing four laps on a high wheel borrowed from the Smithsonian Institute, while Paul Gore adored the three-story dizzy stunts on a three-story bicycle.

Frederick Wagner, by courtesy of the Los Angeles Boxing Association, made the fastest run and he manipulated the artificer in the most efficient manner. Referee Pat Higgins referred to him as unusually able and resourceful. Pat Higgins followed the bike game in Australia, making some future for it. He believes this will be the half-way point for amateur riders to and from New York.

BARNY OLDFIELD PROVED HIMSELF A MAN OF COURAGE BY MOUNTING A HIGH WHEEL AND DOING FOUR LAPS.

It had been three years since he had mounted himself on one of these, and he is a living example of the fact that a man can keep his balance on a high wheel.

Incidentally, Barney recalled that it was this Bill Furman who beat him in his first western race.

A half-a-dozen people viewed the race from the roofs of adjacent buildings without any damage to their pocketbooks, while many cupcake perchers in the neighboring houses were overjoyed to see the action trees broke in two with such violence and there were cupcakes all over the ground. The results:

1. Fred St. Onge, 2nd; E. R. St. Onge, 3rd; Nathan Tordoff, 4th; Bill Furman, 5th; and Nathan Tordoff, 6th.
